Our Methodology

The **inlingua method** teaches learners to communicate in the target language from their very first lesson. Our learners are encouraged to use the target language in class, helping them to learn the language quickly.

Skills taught in class:

- Listening
- Speaking
- Reading
- Writing

Among all 4 skills, the inlingua method places most emphasis on speaking, and grammar is taught indirectly.

Group classes are kept small to allow for maximal teacher-learner interaction during sessions.

Some of our treasured clients:

“My teacher was very approachable and went the extra mile to ensure that the curriculum not only met our requirements but was fun and interesting too. Despite most of the class having little prior exposure to the Spanish language, our teacher helped build our foundation in a fun and manageable way. She incorporated a variety of interactive activities and games into her lessons, ensuring that we were engaged and challenged. As she knew that we were frequenting Latin America a lot, she also introduced the cultural nuances across different Latin American countries. Due to her hard work, we were able to quickly apply things that we learnt during the course to aid our daily work.”

Rui Yun – CORPORATE COURSE

Hear from our learners...

“I like the teachers, they are very experienced and able to help and navigate the students through any difficult questions raised or when having difficulty understanding the lesson at any time.”
